Specialists in High-Tech Security Training

## Welcome to Smart Approach

### Global provider

Smart Approach is a global provider of leading high-tech security training solutions, including computer based (CBT) x-ray screener training and security training solutions.

As a well established organisation with a proven track record, our solutions are specifically developed to assist people who are involved in protecting high-risk environments; such as airports, aircraft, ports, cruise ships, law enforcement centres, military bases and government buildings.

### Ethical and professional business approach

Smart Approach is recognised for its ethical and professional business approach to its many clients, which is just one of the reasons that Smart Approach x-ray screener training and security training solutions are currently being used to train over 250,000 screeners world-wide.

### The need for security training

Following the events of 9/11 and the 7 July London bombing, and as threat levels shift to severe, millions of lives are increasingly reliant upon the proficiency of security staff.

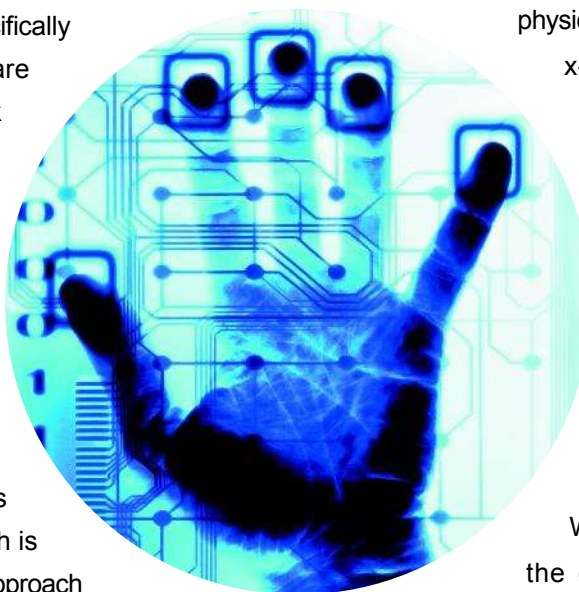

Every day countless packages and baggage items are screened for potentially lethal articles. Existing technology is only effective if security screeners are well-trained to recognise the numerous types of threats and if they can fully utilise the security equipment on hand. Security personnel must be familiar with metal detectors, physical search procedures, hand-wanding, x-ray machines, ion detection, EDS machines and much more.

Training for x-ray screeners and security is increasingly vital for development and maintenance of these skills, especially with new technology and emerging threats on the horizon.

### Leading Solutions

We have a unique understanding of the challenges involved with training security professionals and through a combination of security expertise and market leading products we are able to help your organisation maintain and increase screener competence.

We offer a range of high-tech security training solutions which have been developed using our specialist experience in the aviation industry and our work with the leading manufacturers of security and simulation equipment.

Specialists in High-Tech Security Training

## Welcome to Smart Approach

### Our training solutions include:

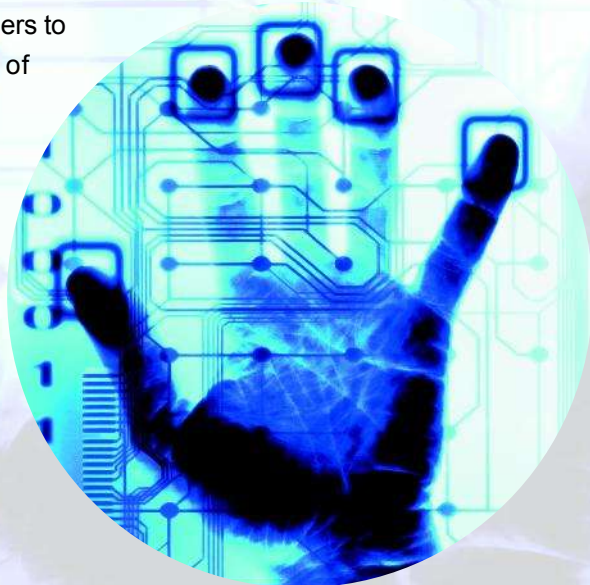

- **SmartSystem** – a market-leading computer-based simulation product for x-ray screener training. This product is available for training screeners on all of the major manufacturer's x-ray equipment.
- **Airport Security Checkpoint Screener Course** – a CBT training course for all airside security personnel which is compliant with ICAO guidelines
- **Airside Security Awareness Course** – general security training for non-security personnel working in airports
- **General Security Checkpoint Screener Course** – computer based training for non-aviation checkpoint security personnel
- **Threat Image Projection Awareness (TIP) Course** - a course covering the practical use of Threat Image Projection for operators
- **Mailroom Security Course** – computer based training for effective mailroom screening
- **Improvised Explosive Devices Course** – exercise based training for screeners to train them in the recognition of explosive devices
- **Port Facility Security Awareness Course** – general security training for non-security personnel in marine ports

- **Port Facility Security Force Course** – general security training course for security officers working in the marine port environment
- **Firearms & Explosives Recognition Course** – a training course for all security personnel who are required to identify hidden firearms and explosives
- **Cargo Simulator** – Training to ensure the highest performance levels of cargo x-ray screeners

### Flexible and affordable security training

We provide flexible and affordable high-tech security training solutions to a vast range of clients of all sizes around the world on a basis that suits their requirements; from a one off licence fee to a monthly pay-per-user charge. All clients have the opportunity to benefit from the after care and maintenance programme which ensures they always have the back-up and support needed.

**If you are involved in protecting high-risk environments then our scaleable, yet affordable solutions will be of real benefit to you. Please call us to discuss how we can help you.**
